

Authentication Endpoints

1. Register User

POST /api/Auth/register

Body (JSON):

```
{
  "email": "user@example.com",
  "username": "user123",
  "password": "Password",
  "firstName": "John",
  "lastName": "Doe"
}
```

Response: Returns a JWT token and user details if successful.

2. Login User

POST /api/Auth/login

Body (JSON):

```
{
  "email": "user@example.com",
  "password": "Password"
}
```

Response: Returns a JWT token and user details if successful.
